

Aurum Xtra
with **Manuka Honey**

Introducing the
Aurum[®] Xtra
range

Innovators in **Stomacare**

Combining two revolutionary innovations in one unique pouch.

Specifically developed to improve colostomates' quality of life; Aurum[®] Xtra is an essential solution for any colostomate whose life is restricted by the inconvenience and embarrassment of disposing of a standard closed pouch.

The Aurum[®] Xtra inner liner can be flushed in any system that takes toilet tissue, giving the feeling of a normal toilet experience and liberating the wearer of any anxiety they may have had before.

For those with sore and excoriated skin, Aurum[®] Xtra also has Manuka Honey added to the skin friendly Hyperflex[®] hydrocolloid flange, which may help to promote healthy skin around the stoma.

Benefits at a glance...

Skin Friendly

The Hyperflex[®] hydrocolloid flange has added Manuka Honey, which may help to promote healthy skin around the stoma

Manuka Honey

This type of active Manuka Honey has characteristics that kill bacteria, suppress inflammation and stimulate the growth of cells

Freedom

Never have to carry a used pouch again

Flushable in domestic toilets
A time saving and convenient solution to pouch changing

Flushable liner

Inner liner and flange that can be simply flushed

Biodegradable and will disperse in the sewerage system

Features & Benefits

- The Hyperflex[®] hydrocolloid with added Manuka Honey is skin friendly and may help reduce skin irritation
- Removable flange - users can choose to separate the inner liner and flange if they wish, giving them a wider choice of how to dispose of the pouch and waste
- New Dual-Carb[®]2 filter - laser cut for optimum accuracy to ensure less ballooning and more effective management of gas and odour
- easy2peel[™] tab - supports the smooth removal of the flange, reducing skin trauma
- Super soft water repellent cover - exceptional comfort even during extended wear
- Cutting guide - allows a perfect fit for different stoma shapes and sizes, reducing skin irritation and potential leakage
- Mini, midi and maxi sizes available to suit individual needs

“ I feel this is a major improvement. It is quicker and cleaner. I say this after 19 years of use. Aurum[®] Xtra makes me feel more human ”

Mrs P.M from Bexhill, UK

How to use Aurum[®] Xtra

Disposal of Aurum[®] Xtra is very simple and quick to do. Just follow the easy steps below.

Step One

Dispose of the outer pouch in the bin

Step Two

Flush the inner liner and flange down the toilet

Or separate the inner liner & flange,
the choice is yours!

Step One

Dispose of the outer pouch in the bin

Step Two

Flush the inner liner down the toilet

Step Three

Discard flange in the appropriate waste disposal bin or flush down the toilet

Your Questions Answered...

What are the benefits of having Manuka Honey in the flange?

Welland Medical's Hyperflex[®] hydrocolloid is formulated based on natural ingredients. Historical data supports the use of these ingredients for the application of the adhesion of ostomy pouches to the patient's skin. Manuka Honey is known for its therapeutic properties and may help to promote healthy skin around the stoma.

Manuka Honey is pure and natural, made only from the nectar of the Manuka flower in New Zealand. Throughout time, honey has been known for its many therapeutic properties. It is one of the oldest known remedies, used over thousands of years and continues to be used today. Historical research has shown this type of active Manuka Honey has characteristics that kill bacteria, suppress inflammation, and stimulate the growth of cells which may aid the healing process.

How do I know if it will disperse and dissolve?

Aurum[®] Xtra is made of 3 biodegradable parts:

1. The white inner liner is made up of a mixture of simple polymers and cellulose which dissolve in water.
2. Inside the white liner there is a transparent film that contains the waste. This is also made up of simple polymers.
3. The flange is made of hydrocolloid which is a mixture of natural materials. When immersed in water the flange absorbs water, swells, fragments and disperses.

Biodegradation occurs in the main sewerage system by bacterial action. It is these bacteria which break down the 3 components of Aurum[®] Xtra. The process takes the same amount of time as with normal faeces.

“It flushes easily... I feel more confident when out and about.”

Mrs P.B from Hereford, UK

How do I know it will flush?

Welland Medical has been leading the way in flushable innovation since 1996, when the world's first flushable ostomy pouch was launched (Impact). The Welland Medical Aurum[®] Xtra and Flair Active[®] Xtra remain the only flushable ostomy pouches in the world. Aurum[®] Xtra has had extensive testing through flushability tests based on the UK and international standards conducted at the Water Research Council, Swindon, UK.

How Aurum[®] Xtra biodegrades

The inner liner and flange are flushable in any system that takes toilet tissue including; septic tanks, aeroplane and vacuum extraction systems and portable toilets.

To biodegrade in the sewerage system it takes the same amount of time as with normal faeces.

1
Simply Peel & Flush...

2

The inner liner enters the sewerage system

3

The bacteria in the water starts to break down the inner liner and flange

4

Waste inside the pouch leaks out into the system and is broken down by the bacteria

5

Finally the biodegradable inner liner is completely broken down by the bacteria

“
The pouch is great!
I feel more confident.”

Mrs C.D from The Netherlands

“
These flushable pouches
are great... they give you
a more normal way of life.”

Mrs S.F from Gwent, UK

“
I find it very easy
to use and much
better for my skin.”

Mrs M.C from Reading, UK

It's kind to the environment

The biodegradable inner liner and flange makes Aurum[®] Xtra the 'greenest' ostomy pouch.
