Welland

Explore our trusted range of Stoma Care Accessories, carefully designed to meet the diverse needs of someone living with a stoma. From skin protection to leak prevention, our high-quality accessories are crafted to enhance confidence in daily life. Whether seeking reliable and secure solutions or gentle skin barriers, our trusted Stoma Care Accessories have got everyone covered.

Feel Empowered.

A stoma journey is unique – and so is every individual behind it. That’s why Welland Stoma Care Accessories are created to empower people to live confidently, comfortably, and on their own terms. Adaptable to all lifestyles, our range supports personal choice, independence, and dignity at every step.

The PROTECT RANGE

Leakage can get in the way – but it stops here. Welland Stoma Care Accessories are made to help prevent leaks, protect skin, and enhance comfort and confidence, helping individuals live life their own way.

The CARE RANGE

Healthy skin isn’t a nice-to-have – it’s fundamental. Welland Stoma Care Accessories are designed for gentle removal and supporting skin health – offering care that fits naturally into any routine.

The SECURE RANGE

A secure fit isn’t a luxury – it’s essential. Welland Stoma Care Accessories are designed for a personalised secure fit, offering those living with a stoma everyday confidence.

The PROTECT RANGE

Sometimes skin needs a little extra protection. Prioritise skin health and protect against leaks with our reliable solutions suitable for every body.

Unmatched Leak Protection.

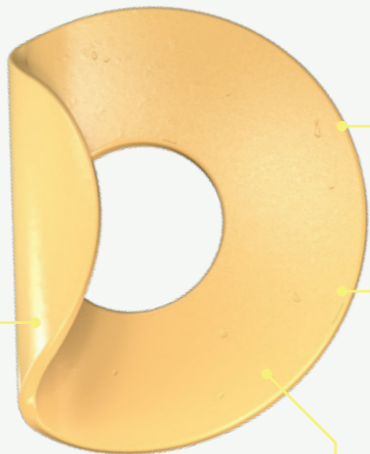

Leakage can get in the way – but it stops here.

Welland Stoma Care Accessories are made to help prevent leaks, protect skin, and enhance comfort and confidence, helping individuals live life their own way.

HyperSeal® Mouldable Seals

Close the gap on leakage with a personalised fit that moves with the body. Our mouldable seals protect against leaks and promote skin health, offering customisable protection for every body.

The highly absorbent HyperSeal® hydrocolloid helps reduce the risk of irritation, maceration and Moisture Associated Skin Damage (MASD).

The Everyday Protector: Our thinnest seal yet, at 2.5mm, giving a low discreet profile, perfect for every day wear. Available in 50mm / 60mm / 70mm / 80mm.

Bridge the gap between the stoma and the pouch with our mouldable seals which are easy to shape, stretch, cut, tear, or rejoin to create a secure seal. Can be effortlessly repositioned or reshaped as needed for a custom fit.

Available with Manuka honey and accredited by The Skin Health Alliance body, you can have extra reassurance that our products are kind to skin.

Effectively fills scars, skin folds, dips and crevices to prevent leaks and protect the skin around the stoma.

The Ultimate Protector: Our greatest level of coverage giving additional security across larger skin areas and conforming to uneven surfaces to create a smooth even area. Available in 100mm.

The Extra Protector: Our thickest seal, at 4mm, offering our greatest level of absorption making it ideal for high output stomas, extending wear time, and extra protection when required. Available in 50mm.

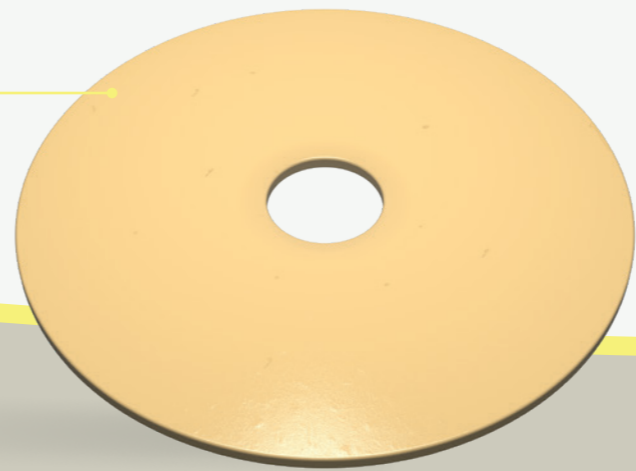

86%

found that HyperSeal® Mouldable Seals were easy to mould.*

“
HyperSeals® are my saviour.”

Jess Skipper, HyperSeal® Mouldable Seals User

Stoma Powder

Designed to absorb excess moisture, help adhesion and prioritise skin health.

Promotes skin health by absorbing excess moisture from around the stoma.

Can be used in combination with Welland Barrier Film (WBF®) to build up a crust providing long-lasting protection and improved pouch adhesion.

Easy application due to the fine nibbed top, ideal for covering larger areas of wide spread moisture or targeting hard to reach crevices for ultimate accuracy.

Hydrocolloid powder featuring skin friendly ingredients that won't irritate the skin on application or during wear.

Stoma Paste

Our Stoma Paste fills in the deepest of crevices, dips and scars, effectively sealing against leaks.

Alcohol free formulation that won't sting or irritate the skin on application.

Fills in gaps and creases around the stoma to create a smooth surface for pouch application, decreasing the risk of leaks.

Pliable during application and offers flexibility to mould into and fill the toughest of gaps, with the squeezable tube.

Can be used alongside HyperSeal® Mouldable Seals to fill in the deepest creases and dips.

“
I had no leaks anymore and no skin irritations by using the stoma paste to fill irregular gaps.”

Stoma Paste User

Welland Barrier Film (WBF®)

WBF® forms a breathable protective shield that works in harmony with the skin, helping to prevent irritation and give peace of mind with every use.

Protects against skin stripping and helps reduce the risk of Medical Adhesive Related Skin Injury (MARS) and Moisture Associated Skin Damage (MASD).

Can be used in combination with Stoma Powder to build up a crust providing long-lasting protection and improved pouch adhesion.

Suitable for paediatric use from 30 days old.

Available in convenient spray and easy-to-use wipes.

WBF® spray application is quiet offering users discretion and the can is easy to use with the ability to spray at any angle – ideal for the hard to reach areas – giving users full control.

The sting free, skin friendly formulation does not cause irritation even on sore skin and dries quickly upon application, making pouch changes easier and quicker.

“
Game Changer.”

WBF® User

The **SECURE** RANGE

For complete security our Stoma Care Accessories offer a reliable and a secure fit for every lifestyle.

Stay Securely Protected.

A secure fit isn't a luxury – it's essential.

Welland Stoma Care Accessories are designed for a personalised secure fit, offering those living with a stoma everyday confidence.

HydroFrame®

Setting the scene for flange extenders, HydroFrame® was the first on the market in 2003. Since then, many have tried to replicate its innovative design – but HydroFrame® remains the original and trusted choice for lasting security and extended wear time.

Ensures the pouch stays secure by preventing edges from lifting, offering prolonged security and extended wear time. Resulting in fewer pouch changes and enhanced user confidence.

Provides added fixation around a hernia.

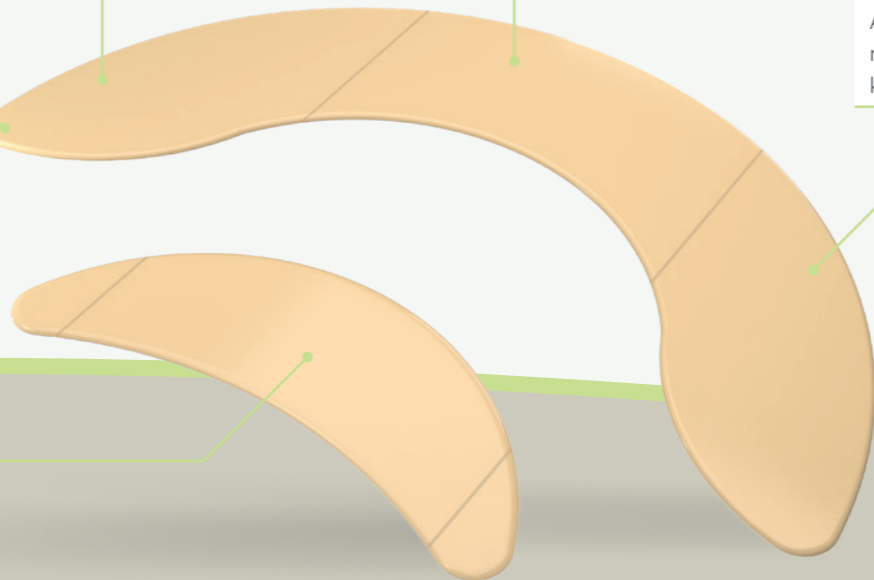

Our trusted skin friendly hydrocolloid features fewer ingredients and lowers the risk of allergies and irritation, ensuring comfort for our users.

Available with Manuka honey and accredited by The Skin Health Alliance body, you can have extra reassurance that our products are kind to skin.

Provides 360-degree fixation with just two pieces, even around challenging areas making it suitable for every body.

HydroFrame® Mini provides targeted support, offering a discreet alternative for those more specific areas.

“
*I love these.
Gives me that extra
support and peace
of mind.*”

HydroFrame® User

UltraFrame®

UltraFrame® is our thinnest flange extender offering an almost invisible appearance so confidence is not compromised, no matter the lifestyle.

Ensures the pouch stays securely in place by preventing edges from lifting, offering prolonged security and extending wear time, meaning less pouch changes for users.

Easy application with step by step guidance.

Offers pain-free removal and leaves no residue on the skin, for quick and easy pouch changes.

Crafted from highly breathable materials, UltraFrame® prioritises skin health, every step of the way.

Offers a lightweight, flexible fit that moves with the body. Its ultra-thin, transparent design blends seamlessly with the skin, making it virtually invisible under clothing.

Perfect for everyday wear and activities, even during swimming and other water-based activities with its waterproof properties.

“
UltraFrame® is over 10x thinner than a strand of hair.”

Dr Arash Moavenian

100%

rated the discretion, security and conformability of UltraFrame® excellent or very good.*

“
You don't really feel like you've got anything on.”

Kav Elison, UltraFrame® User

The CARE RANGE

Our products allow for quick, convenient and pain-free pouch removal helping users care for their skin.

We Care About Skin.

Healthy skin isn't a nice-to-have – it's fundamental.

Welland Stoma Care Accessories are designed for gentle removal and supporting skin health – offering care that fits naturally into any routine.

Medical Adhesive Remover

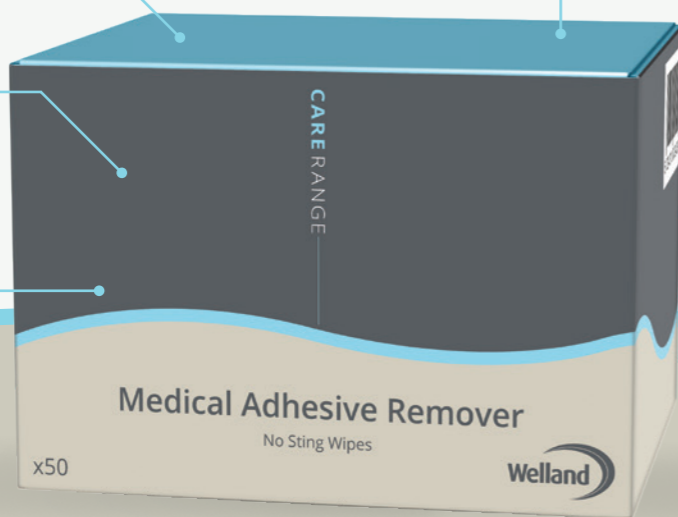

For when a pouch change is needed, our care range gently removes without stinging, or compromising skin health.

Protects against skin stripping and helps reduce the risk of Medical Adhesive Related Skin Injury (MARSI).

Facilitates easy pouch removal without compromising the adhesion of the next stoma appliance, for faster pouch changes, reassurance and peace of mind.

Quickly dissolves adhesive residue ensuring painless removal of stoma appliances, leaving the skin clean and refreshed.

Available in convenient spray and easy-to-use wipes.

The sting free, skin friendly formulation will not sting or cause irritation even on sore skin.

Spray application is quiet offering users discretion and the can is easy to use with the ability to spray at any angle – ideal for the hard to reach areas – giving users full control.

91%

found their stoma bag easier to remove when using an adhesive remover*
